Application No. 10/625,916 Amendment After Allowance Dated Nov. 15, 2004

## **AMENDMENTS TO THE CLAIMS**

This listing of claims will replace all prior versions, and listings, of claims in the application. Please amend Claims 80 and 87 as follows:

1. (Original) An underground mining method, comprising: excavating in situ material in an underground excavation with a mining machine; backfilling at least a portion of the underground excavation with a particulate material to define a trailing passage, wherein an area of a cross-section of the trailing passage is no more than about 30% of an area of a cross-section of the at least a portion of the excavation before backfilling; and

thrusting off of the backfilled particulate material to propel the mining machine forward.

- 2. (Original) The method of Claim 1, wherein the backfilled particulate material was previously excavated by the mining machine and the backfilled particulate material is unconsolidated after the backfilling step.
- 3. (Original) The method of Claim 1, wherein in the excavating step a movable shield is used to provide ground support during excavating and further comprising:

forming a tunnel liner under the movable shield to provide ground support for the trailing passage.

4. (Original) The method of Claim 1, further comprising:

removing from the underground excavation a first portion of the material excavated by the mining machine and wherein in the backfilling step a second portion of the material excavated by the mining machine is used as the particulate material.
